How to select your New Yorker awning

Customer Comments

Loved our Awning we purchased from you! Easy install, very attractive! I put 2 of these on our business doors. We own a door and window company. I have had numerous requests since they have been up to quote these installed for my customers! We may have to add these in our line-up! Thanks so much.

R.V., Texas

I performed the installation myself and found it to be very simple. The reason for installing the awning was twofold. First, we wanted to protect the door casing from the elements. Without such protection, you will experience a slow decay of the wood casing at the bottom of the door. Second, we needed a covering to keep us out of the rain when entering through this door of our home. Very happy with the product.

Dimensions

76.5 inches wide, 58" height by 48" projection
